MAGNUS ÅHMAN

QUALITY ASSURANCE GAME TESTER

PROFILE

Manual QA tester with AAA title experience, specializing in functional testing.

EDUCATION

- Futuregames** 2022 - 2023
Quality Assurance Game Tester
I completed a comprehensive QA and testing program covering key areas including console, mobile, web app, load, regression, and usability testing. Gained experience in release management, team collaboration, and project development through three game projects and a graduation project.

GAMING INDUSTRY

- Starbreeze Entertainment** AUG - DEC 2023
Quality Assurance Game Tester
I focused on functional testing on their gaming product Payday 3. My key responsibilities included writing detailed bug reports and following them through to completion via regression testing. I worked with multiple Accelbyte backend servers to gather game data and statistics for ongoing tests, including crossplay testing between platforms. Additionally, I routinely monitored the community forum to collect player feedback and suggestions, which helped inform testing priorities. Following structured test plans and cases, I ensured a thorough and consistent approach to quality assurance. Known for my quick learning, reliability, and independent work style, I was able to take ownership of tasks from start to finish while maintaining a positive and collaborative attitude in the workplace. My experience in this role has sharpened both my technical skills and my ability to work collaboratively in game development.
